## Short Term Course on "Data Visualization through Power BI and Tableau: Tools and Technologies for Business Intelligence"

7<sup>th</sup> April 2022 to 9<sup>th</sup> April 2022

### Introduction

Data visualization and business intelligence both are required together and play a very important part in any organization's management team. Business intelligence is a process that makes information easier to understand and data visualization is a method to tell a story of information. The most accepted and top two tool used globally by organization for business intelligence are Microsoft Power BI and Tableau. Power BI and Tableau are two important Business Intelligence (BI) technologies for the collection, integration, analysis, and presentation of business information. They help you perform data analysis, data manipulation, and data visualization to make sense of business data and draw insights.

Power BI is a business analytics service provided by Microsoft that can analyze and visualize data, extract insights, and share it across various departments within your organization. Power BI is easy to use, faster and performs better when the volume of data is limited. Power BI tends to drag slowly while handling bulk data. Tableau is a powerful Business Intelligence tool that manages the data flow and turns data into actionable information. It can create a wide range of different visualization to present the data and showcase insights interactively. Tableau is emerging as one of the hottest trends in the Business Intelligence market. The Data Visualization tool has been gaining popularity in various companies and hence, the demand for Tableau experts in on the surge. Tableau can handle large volumes of data quickly. It is faster and provides extensive features for visualizing the data. Tableau doesn't limit the number of data points in visualization or enforce row or size limitations, giving you a 360-degree view of your data.

### Why should you take Training of this Course?

- Tableau has been positioned as a Leader in the Gartner Magic Quadrant for Analytics and Business Intelligence Platforms - Gartner.com.
- Verizon, Facebook, Dell, General Motors, KPMG, Bank of America and 35,000 other MNCs worldwide across industries use Tableau.

## Faculty of Commerce and Management

- In India, the average Tableau Developer Salary is about ₹502,947 per year, which may soon rise to ₹923,000 per year
- **Various Job Opportunities:** Tableau job roles and profiles include Tableau Developer, Data Analyst, Senior Tableau Developer, Tableau Consultant, Business Analyst, Business Intelligence Analyst, Business Intelligence Manager

### Course Outcome

After completion of this course, the participants will be able to learn:

- Concept of data visualization and tools used to visualize the data.
- Transformation of data through cleaning, splitting, pivoting, and merging techniques.
- Establishment of connection with data and perform various data preparation steps for visualizing it.
- Understanding the new ways of analyzing data, through various features in-built within Tableau and Power BI.
- Creating personalized and dynamic visualizations through parameters.
- Development of interactive dashboards using actions.
- Exploring various design practices for creating dashboards.
- Learn to publish and share dashboards and manage permissions to your published data.
- Get an extensive hands-on expertise on various tips and tricks with Tableau and Power BI.
- Create reports and visualizations, derive real-time insights from business with purpose to develop, publish and share interactive dashboard

### Course Content

#### Module 1 (6 hours)

- Introduction to data visualization

  
Registrar  
SGT University,  
Budhera, Gurugram

## Faculty of Commerce and Management

---

- Introduction to Power BI
- Data cleaning
- Importing Data in Power BI
- Building Charts in Power BI
- Filters in Power BI
- Data modelling in Power BI
- DAX and Dashboard
- Connecting to a web data source
- Dashboard in Power BI
- Art of Data Visualization: Power BI

### Module 2 (6 hours)

- Introduction to Tableau
- Introduction to Tableau interface
- Data Connection and Types of Charts
- Tableau Data connection
- Creating views in tableau
- Editing Meta data
- Building Views
- Types of Charts
- Types of Charts
- Types of charts in Tableau

### Module 3 (6 hours)

- Data joins in Tableau
- Creating Joins in Tableau
- Data blending in Tableau
- Calculative fields in Tableau
- Dashboard Design in Tableau
- Building Story cards in Tableau
- Art of Storytelling using Visualization in Tableau
